**Saint Blaise** was the bishop of Sebastea and a doctor. The first known record of the saint's life comes from the medical writings of Aëtius Amidenus, where he is recorded as helping with patients suffering from objects stuck in their throat. Many of the miraculous aspects of St. Blaise's life are written of 400 years after his martyrdom in the "Acts of St. Blaise."

Saint Blaise is believed to begin as a healer then, eventually, became a "physician of souls." He then retired to a cave, where he remained in prayer. People often turned to Saint Blaise for healing miracles.

In 316, the governor of Cappadocia and of Lesser Armenia, Agricola, arrested then-bishop Blaise for being a Christian. On their way to the jail, a woman set her only son, who was choking to death on a fish bone, at his feet.

Blaise cured the child, and though Agricola was amazed, he could not get Blaise to renounce his faith. Therefore, Agricola beat Blaise with a stick before beheading him.
